

*Open Marsh Water Management
Advisory Committee Meeting*
for
The Norfolk County Mosquito Control Project

10/4/2007

Dear Advisory Committee Member,

The Norfolk County Mosquito Control Project is preparing for an advisory committee meeting on Wednesday October 31st at 9:30am. The format for this years meeting will be similar to last years. I again would like to make this years meeting primarily a field meeting. We have one new project that we would like to complete this season. (Phase 3 of the Meadows Marsh, Quincy). We will visit this site in Quincy and review our proposal. I have included a copy of an aerial photo/map of the site where we will meet at 9:30 – Victory Rd in Quincy.

I would also like to visit some past sites so you can see completed projects and how they look now. Last year we intended to do this but were prevented by time constraints. We do not have enough time to review all past projects so I will choose a couple that are relatively close together that also present good and bad results. The following are previous site locations of OMWM projects we have completed.

Upper Blacks Creek Marsh, Quincy	1999/2000
Audubon Avenue Marsh, Braintree	2001/2002
Call Road Marsh, Weymouth,	2001/2002
Pearl Street Marsh, Weymouth	2001/2002
Granite Avenue Marsh, Milton	2003/2004
Third Marsh, Quincy	2003/2004
Neponset West Marsh, Quincy	2003/2004
Germantown Marsh, Quincy	2005/2006
The Meadows Marsh, Quincy	2005/2006
First Marsh, Quincy	2006/2007
The Meadows Marsh 2, Quincy	2006/2007

If anyone has any site suggestions or questions please respond in the next few weeks
